Profile

I am a young Android and Backend Developer who loves to build beautiful experiences for users. I am fairly experienced in the MVVM Archtecture for Android and Microservices for Backend. I am currently pursuing Engineering in Information Technology at **Gautam Buddha University**.

Skills

Kotlin ●●●●●●○○

Go ●●●●●●●○

Python ●●●●●●○○

Flutter ●●●●●●○○

Typescript ●●●●●○○○

Rust ●●○○○○○○

Languages

English   -   Full Working Proficiency

Hindi   -   Native

Projects

Notion
A FOSS Blogging Platfrom

I wanted to write blogs about my discoveries about the Langauges and Technologies I Love but couldn't find any good Platform. So, I wrote one.

Tech Stack Used:
For Backend - Golang, Fiber etc.
For Frontend - React, TS etc.
For Android - Kotlin, Jetpack
                        Compose.

GBU Agenda
A Schedule App for My University

The Schedule app available earlier was not exactly what i would say as aesthetic. So, I wrote one that is aesthetic.

Tech Stack Used:
For Backend - Python, SQL etc.
For App - Flutter, Riverpod etc.
